At Health Care Unlimited (HCU), every patient is important, regardless of the complexity of care or payor source. Our commitment to patients and to the integrity of our business drives the daily mission of team members.

The skilled services are provided with the patient's unique needs in mind. We work directly with the hospital or physician's office to coordinate the right care for every patient.

A talented team of providers is available 24 hours a day, 7 days a week. When a patient needs to have a clinical contact, HCU is available. Our achievements are a direct result of the trusting relationships, support and service we provide to our physicians and patients.

At HCU, our goal is to help our patients regain their independent lifestyle. We thoroughly understand our role and know that we help physicians facilitate the patient's continuum of care from their office or hospital to the home. When patients are recovering, HCU knows, there really is no place like home.

We are just a phone call away!

"Why Home Care?"

Home health care includes a broad range of part-time or intermittent skilled nursing care including education and disease management, and other skilled care services such as physical therapy, occupational therapy, and speech therapy. Services may also include medical social services or assistance from a home health aide.

"Who can refer to a home care company?"

Almost anyone can make a referral, including hospitals, nursing homes, physicians' offices, rehabilitation facilities, family members, and other community providers. However, in order to provide the needed care, the patient's physician **MUST** sign a home care agency order to be authorized to provide care.

"Who has the final choice when selecting a home care company?"

Ultimately, the patient makes the final decision. Usually, several interested parties participate in selecting the most appropriate home care company, including the physician, hospital, and family members.

"Why choose Health Care Unlimited?"

HCU physicians and patients have confidence in the experience, knowledge and recognition that comes with an agency that has served South-Texas for over 20 years and earned the National Quality of Approval from The Joint Commission.

Setting high standards to ensure quality outcomes.

Convenient office locations covering nineteen South Texas counties.

Ranked as a Top agency nationwide by OCS HomeCare Elite

Most payors accepted, Medicare, Medicaid, private insurance, private pay.

Accredited by The Joint Commission With deemed status.

In business since 1990 with qualified staff and unmatched experience!

Our Services:

Home Health Care

Home health care includes a broad range of part-time or intermittent skilled nursing care including education and disease management, and other skilled care services such as physical therapy, occupational therapy, and speech therapy. Services may also include medical social services or assistance from a home health aide.

Infusion Pharmacy

Our Infusion Pharmacy provides patients with access to medications that are delivered using intravenous therapy through an access device such as peripheral needles or central IV lines.

Community Care (Provider/Attendant Services)

Star and Star+Plus provides access to Community Services. Community Services are personal services provided to a client with functional limitations due to a medical condition. Services can be custodial in nature as well as skilled depending on the client's qualifications and condition.

Private Duty Care

Private Duty Care is available for those who require skilled (licensed) or custodial (non-medical) care. Non-medical care can be provided by a nurse, but is most often provided by assistive personnel such as nursing assistants, companions, sitters or attendants. Private Duty services provide care from 4 to 24 hours per day and can be paid by, Medicaid, long-term health, and in-

In-Home Rehabilitation

Therapy for patients with physical (PT), occupational (OT) and speech and language (ST) needs is available in the home. PT improves mobility, range of motion, muscle strength, reduces chronic pain and restores balance and coordination. OT increases independence with everyday living and household tasks such as eating, grooming and dressing. ST assists patients with difficulty swallowing or other memory problems as well as learning/regaining the ability to communicate.

Pediatric Home Care

Long or short-term intermittent care (home health) is available for Pediatric patients. Long-term skilled nursing home care is available for medically-fragile or technology-dependent children and for children requiring assistance with personal care tasks. We offer support to their families and provide education for any other caregivers.
